DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed in amendment filed 8/31/06 have been fully considered but they are not persuasive. Original claims 1-6 have been cancelled and new claims 7-10 have been added. The prior art relied upon in prior office action covers the new subject matter described in the new claims. The rejection based on Efros (US Patent No 4,161,328) is repeated below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 7 recites the limitation "the foundation assembly" in line six. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Efros (US Patent No 4,161,328). Efros discloses a bicycle comprising: engaging means (100), said engaging means are attached to members (102,104, fig 1A), a strap (94) {girdle

Art Unit: 3611

device in applicant claims}, said strap is coupled to buckles (96,96a), which in turn are coupled to straps (98,98a), said straps are connected to engaging means (100); wherein, said members are attached to the frame of the bicycle. Regarding claim 7, the strap (94) is engaged / anchored to the engaging means (100) {{foundation assembly mentioned in claim 7 and thereby to member (102) {{vertical post mentioned in claim 7}}}. Regarding claim 8, the strap (94) has a buckle (96) as mentioned above and is anchored to the engaging means through the strap (98). Regarding claim 9, it is inherent to say that the buckle (96) is able to pivot about the strap (94). It is also noted that the use of the apparatus mentioned by Efros would result in the method to be performed.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3611

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
